Switch On

Introducing the first graphic films that optimize LED light

3M™ Envision™ Translucent and Diffuser Films

You no longer need to add more LEDs to get the level of brilliance you want. Now you can deliver rich, vibrant signs without hot spots when you use the NEW 3M™ Envision™ Translucent Films and 3M™ Envision™ Diffuser Films. Get great graphics requiring fewer LEDs, using less energy*. The switch to LEDs is on, so lead the way and offer your customers a brilliant solution.

Stay bright

3M technology makes it easy and practical to use LEDs. Get the same level of brightness using fewer light sources, reducing material and maintenance costs. Get more light transmission for vibrant, rich color.

Go greener

3M™ Envision™ Translucent and Diffuser Films give your customers the opportunity to be more sustainable without sacrificing performance. They'll get an energy-saving, premium product backed by an industry-leading warranty. So they won't just look good — they'll feel good, too. You win. They win. The environment wins.

Make the **switch.**
