

MACal Glass Decor™ 500 & 700 Series

Beautifully decorative and private

The MACal Glass Decor 700™ Series combines privacy with great aesthetics. This range of luminous translucent etch films offers winning choices for designers, installers and building occupants.

The look and feel of a space can be transformed by imaginative window graphics - including large or small lettering - ensuring privacy and allowing natural light transmission. The product is available in a dusted and frosted matt finish. The frosted finish is available in Offshore Blue, Fresh Mint, Sparkling Yellow, Romantic Rose and Gold. MACal Glass Decor 700 films are easy to apply onto glass or rigid plastic surfaces, with good removability and no adhesive residue on substrates.

The MACal Glass Decor 798-01 BF™ and 598-03 BF Frosted Film option uses a bubble-free micro-textured adhesive to deliver application results in record time, using dry application. Its micro-textured channels draw in the adhesive so that it cannot be seen, providing an exceptionally smooth appearance.

MACal Glass Decor 500™ icy film and etch-grade vinyls keep costs under control while offering excellent performance for indoor and outdoor window decoration. These films are specially treated to provide a homogeneous translucent colour, giving you both the look you need and reliable privacy.

MACal Glass Decor™ 500 & 700 Series

✔ Advantages

- Optimum light transmission
- 5 frosted grade colours
- 5-year outdoor durability
- Clean cutting via computer for fine lettering and designs
- Outstanding dimensional stability
- Good resistance to staining (including water/oily compounds)
- Clean removal, leaving no adhesive residue on the substrate

✔ Applications

MACal Glass Decor Film is suitable for long-term indoor and outdoor decorative applications on glass or rigid plastic window panes, restaurants, museums, and show-rooms, and for room partitions in banks, offices and homes.

✔ Durability

- Outdoor up to 5 years
